

**Proven to Increase
Insulation Performance
by as much as Double or More!**

An Energy Star friendly product

"SNS Insulation Support Rail"

This very attractive system, supports the insulation and the bottom flange of the purlins. It does not induce the tension conditions that are inherent when using banding or strapping to support the insulation. SNS Insulation rail is a 26 ga. painted rail that supports the insulation every 30 inches on center equally spaced throughout the bay.

- One man Installation
- SNS System can be used with any insulation system
- Will save the erectors time and money in the install

MILLIONS OF SF./FT. INSTALLED & COUNTING!!
